Welcome to the new journal: MARFRESH — Journal of Marine & Freshwater Sciences

Prof. Dr. Tahir ÖZCAN

Editor-in-Chief, MARFRESH — Journal of Marine & Freshwater Sciences

As Editor-in-Chief, I am delighted to announce the launch of MARFRESH — Journal of Marine & Freshwater Sciences, a new international, peer-reviewed, open-access journal.

In today's world, producing and sharing scientific knowledge is crucial for the future. Against this backdrop,

MARFRESH — Journal of Marine & Freshwater Sciences aims to share original, interdisciplinary research on marine and freshwater ecosystems with the international scientific community.

It covers original research in the following areas:

SCOPE OF THE JOURNAL

fisheries
limnology
pollution
aquaculture
oceanography
hydrobiology

biotechnology
marine biology
exotic species
aquatic ecosystems
coastal management
ecosystem dynamics

economic dimensions
environmental monitoring
remote sensing and GIS in water sciences
marine and freshwater resource management
effects of climate change on aquatic systems

With its peer-reviewed, open-access and ethical publishing principles, MARFRESH — Journal of Marine & Freshwater Sciences aims to be a reliable reference source for scientists and practitioners.

All of the topics mentioned in this brief list, as well as their sub-areas, fall within the scope of MARFRESH — Journal of Marine & Freshwater Sciences. Our aim is to publish scientific results and contribute to the development of innovative ideas across different disciplines, as well as increasing international cooperation for the conservation of aquatic ecosystems.

The journal will operate on a continuously publishing model and articles will be published promptly after acceptance. As part of the indexing process, articles will initially be grouped into six-monthly issues.

The International Editorial Board plays an active role in contributing to the journal and will be responsible for re-

viewing and overseeing submissions within their areas of expertise. These areas fall within the scope of Marine & Freshwater Sciences, including marine biology, limnology, fisheries, aquaculture, hydrobiology, ecosystem dynamics, environmental monitoring, the effects of climate change on aquatic systems, exotic species, economic aspects, and water resources management.

With the launch of this first issue, I would like to invite all researchers working in Marine & Freshwater Sciences to consider MARFRESH — Journal of Marine & Freshwater Sciences as a potential publication platform for their original study.

We look forward to receiving your submissions.

Yours sincerely,

Prof. Dr. Tahir ÖZCAN

Editor-in-Chief
